Chapter: Security & Trust at xXenta

1. Purpose & Commitment

At xXenta, we recognize that the confidentiality, integrity and availability of information are essential to our operations and to the trust our customers place in us.

We are committed to implementing and maintaining an Information Security Management System (ISMS) aligned with ISO/IEC 27001.

Our objective is to establish a structured, risk-based approach to managing information security and to continuously improve our controls and processes.

2. Scope of Security

Our information security practices apply to:

- Customer data processed within our solutions
- Internal systems and infrastructure
- Development and deployment environments
- Employees and third parties involved in service delivery

The scope of our ISMS is currently being formalized and documented.

3. Current Status

xXenta is in the process of designing and implementing its ISMS.

While certification has not yet been obtained, we have established a foundation of controls and procedures that support secure operations.

Current measures include:

- Role-based access control to systems and data
- Use of managed and secure cloud environments
- Controlled handling of customer information
- Defined internal procedures for incident response
- Initial documentation of policies and responsibilities

These measures are subject to ongoing review and improvement.

4. Risk Management Approach

We apply a risk-based methodology to information security.

This includes:

- Identification of information assets
- Assessment of risks related to confidentiality, integrity and availability
- Definition and implementation of appropriate controls
- Periodic review and update of risk assessments

Risk treatment decisions are documented and aligned with business objectives.

5. Policies & Controls

We are developing and maintaining a structured set of policies and controls, including:

- Information Security Policy
- Access Control Policy
- Data Protection and Handling Guidelines
- Incident Management Procedure
- Supplier and Third-Party Considerations

Controls are being implemented in alignment with Annex A of ISO/IEC 27001.

6. Incident Management

xXenta maintains procedures for identifying, reporting and responding to information security incidents.

This includes:

- Internal reporting mechanisms
- Incident classification and prioritization
- Response and mitigation actions
- Documentation and post-incident evaluation

Where applicable, incidents are reviewed to identify improvements to controls and processes.

7. Continuous Improvement

Our ISMS is based on the principle of continuous improvement.

We are implementing a structured cycle that includes:

- Internal reviews of controls and processes
- Identification of gaps and improvement actions
- Ongoing refinement of policies and procedures

Formal internal audits and management reviews are planned as part of the next phase of implementation.

8. Roadmap to Certification

xXenta is working towards formal certification under ISO/IEC 27001.

The roadmap includes:

1. Formalization of ISMS scope and documentation
2. Completion of risk assessment and control implementation
3. Execution of internal audits and management review
4. Engagement with an accredited certification body

No specific certification date is currently committed, as we prioritize a thorough and effective implementation.

9. Responsibilities & Governance

Responsibility for information security is assigned within xXenta and integrated into our organizational structure.

This includes:

- Defined roles and responsibilities
- Alignment between management, development and operations

- Ongoing attention to security in decision-making processes
-

10. Third Parties

Where third-party services are used, we take reasonable steps to ensure that they meet appropriate security standards.

This includes:

- Selection of reputable providers
 - Consideration of security capabilities and certifications
 - Limiting access to necessary data only
-

11. Transparency & Contact

We believe transparency is the foundation of trust.

If you have specific questions regarding our security practices, please reach out to us:
